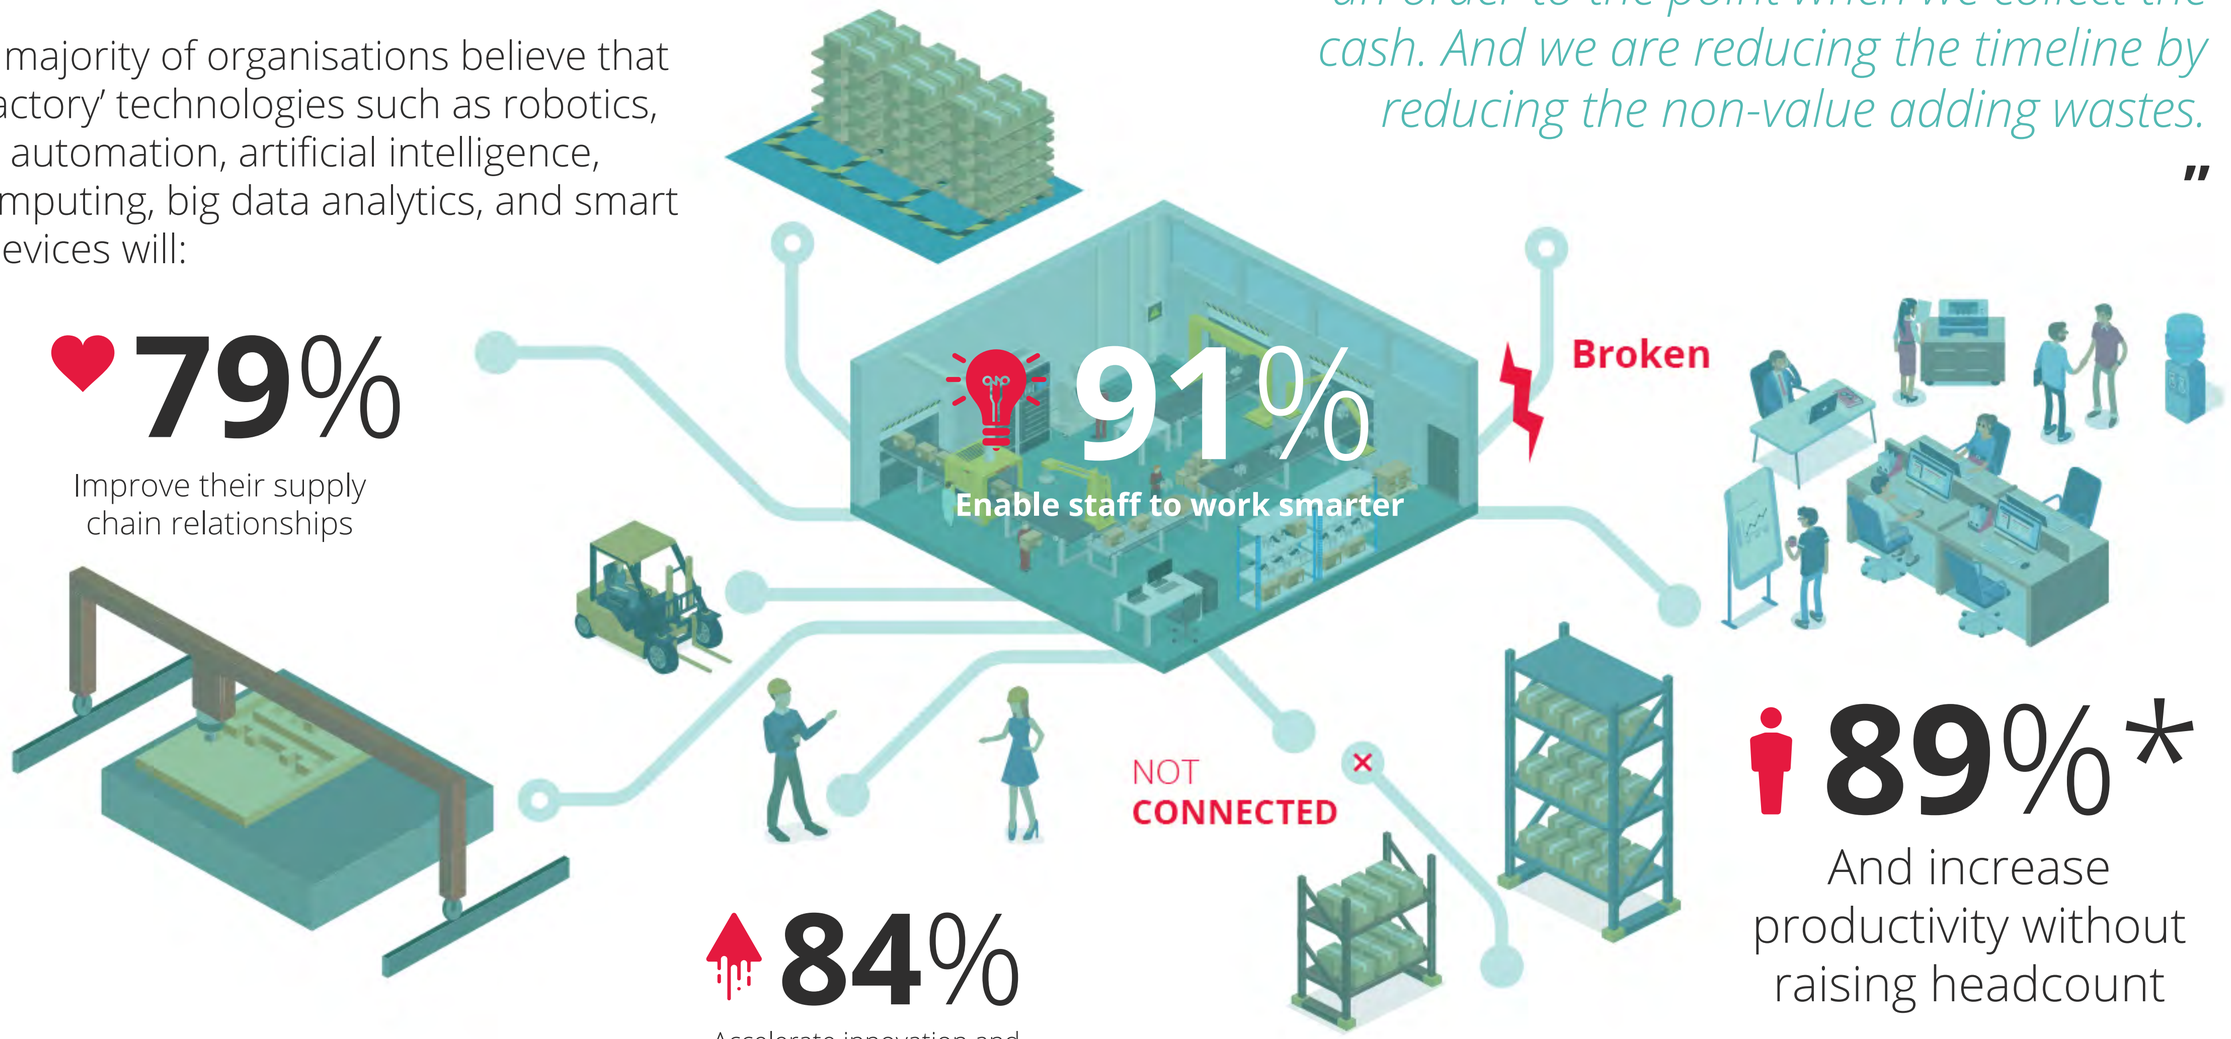
Digitalisation leads to **efficiency improvements across the board**

The vast majority of organisations believe that ‘Smart Factory’ technologies such as robotics, software automation, artificial intelligence, cloud computing, big data analytics, and smart mobile devices will:

> *“All we are doing is looking at the timeline, from the moment the customer gives us an order to the point when we collect the cash. And we are reducing the timeline by reducing the non-value adding wastes.”*



79%

Improve their supply chain relationships

91%

Enable staff to work smarter

84%

Accelerate innovation and design development

89%*

And increase productivity without raising headcount

access
freedom to do more
